

RML2PDF Test Suite - Test #24

This text should be still be indented an extra 1cm on the left even though we switched frames using <nextFrame>. This text should be still be indented an extra 1cm on the left even though we switched frames using <nextFrame>. This text should be still be indented an extra 1cm on the left even though we switched frames using <nextFrame>. This text should be still be indented an extra 1cm on the left even though we switched frames using <nextFrame>. This text should be still be indented an extra 1cm on the left even though we switched frames using <nextFrame>. This text should be still be indented an extra 1cm on the left even though we switched frames using <nextFrame>.

This text should be unindented. This text should be unindented. This text should be unindented. This text should be unindented. This text should be unindented. This text should be unindented. This text should be unindented. This text should be unindented. This text should be unindented. This text should be unindented.

This text should be indented an extra 1cm on the right <indent right="1cm">. This text should be indented an extra 1cm on the right <indent right="1cm">. This text should be indented an extra 1cm on the right <indent right="1cm">. This text should be indented an extra 1cm on the right <indent right="1cm">. This text should be indented an extra 1cm on the right <indent right="1cm">.

This text should be indented an extra 1cm on the right <indent right="1cm">. This text should be indented an extra 1cm on the right <indent right="1cm">.

We did an <indent left="1cm"> tag inside the original one. We did an <indent left="1cm"> tag inside the original one. We did an <indent left="1cm"> tag inside the original one. We did an <indent left="1cm"> tag inside the original one. We did an <indent left="1cm"> tag inside the original one. We did an <indent left="1cm"> tag inside the original one. We did an <indent left="1cm"> tag inside the original one. We did an <indent left="1cm"> tag inside the original one. We did an <indent left="1cm"> tag inside the original one. We did an <indent left="1cm"> tag inside the original one.

left="1cm"> tag inside the original one.

We closed one of the indent tags. We closed one of the indent tags. We closed one of the indent tags. We closed one of the indent tags. We closed one of the indent tags.

We closed one of the indent tags.

Now we closed the other indent tag. Now we closed the other indent tag. Now we closed the other indent tag. Now we closed the other indent tag. Now we closed the other indent tag. Now we closed the other indent tag.

1) Item 1 of outer list. Item 1 of outer list. Item 1 of outer list. Item 1 of outer list. Item 1 of outer list.

2) Item 2 of outer list. Item 2 of outer list. Item 2 of outer list. Item 2 of outer list.

1) Item 1 of inner list. Item 1 of inner list. Item 1 of inner list. Item 1 of inner list.

2) Item 2 of inner list. Item 2 of inner list. Item 2 of inner list.

3) Item 3 of outer list. Item 3 of outer list. Item 3 of outer list. Item 3 of outer list.

RML2PDF Test Suite - Test #24

Now order lists with seqChain/Format

- 1) Item 1 of outer list.
- 2) Item 2 of outer list.
 - a) Item 1 of first level list.
 - i) Item 1 of second level list.
 - ii) Item 2 of second level list.
 - b) Item 2 of first level list.
 - i) Item 1 of second second level list.
 - ii) Item 2 of second second level list.
 - Item 1 of third level list.
 - Item 2 of third level list.
 - c) Item 3 of first level list.
- 3) Item 3 of outer list.
